Environmental  
Sciences (GEES)

HIGHER EDUCATION ACADEMY SUBJECT CENTRE FOR  
GEOGRAPHY, EARTH AND ENVIRONMENTAL SCIENCES (GEES)

## **Learning for Sustainable Futures skills for social and environmental responsibility**

**22/23 March 2006**

**Liverpool**

### **FIVE FREE PLACES FOR STUDENTS OF GEOGRAPHY, EARTH AND ENVIRONMENTAL SCIENCES (GEES)**

We can offer five free places at a residential event for GEES students who are interested in sustainability and corporate social responsibility (CSR) issues, and preferably with ideas and/or experience about how they can be included in the curriculum.

The event is a major part of a project involving staff and students across a range of subject areas\* to develop resources that can be used by academics and support staff responsible for curricula in these areas. The two-day event will consist of working through a problem scenario that raises sustainability/CSR issues, using case studies, role play, fieldwork and simulations. Participation with experts and local companies will ensure realism.

You will have the benefit of working alongside specialists in the field and have the opportunity to assist them in developing a national project to further the inclusion of CSR/sustainability in the undergraduate curriculum.

Travel, accommodation and meals will be covered by the GEES Subject Centre.

Places will be allocated from short statements (max 500 words) on why you should be given a place at this event, drawing on your past experience and hopes for the future.

Please email [wendy.miller@plymouth.ac.uk](mailto:wendy.miller@plymouth.ac.uk) to receive application details, or visit
