

Planet

December 2008 : Number 21

Special Issue on Employability, Employer Engagement and Enterprise
in the GEES Disciplines

www.gees.ac.uk

In this issue

- Employer engagement in the Earth and environmental sciences
- HEA support for employer engagement
- Brief introduction to generational theory
- A gap analysis of student employability profiles, employer engagement and work-placements
- Employability of GEES graduates: the approach of the Environment Agency
- Today's talent – Tomorrow's energy: employing geography, earth and environmental scientists
- Employer engagement - a practical perspective
- The Chester Graduate/Undergraduate Employability Conference and Employability Strategy
- Meteorology employers' requirements of graduates
- Raising student awareness of enterprise skills: accredited and non-accredited routes
- Enterprise and education in Geography
- Embedding employability and employer engagement into postgraduate teaching: a case study from 'environmental management systems'
- Knowledge transfer partnerships, environmental management systems and masters level teaching
- Establishing a skills and employability audit and some devices for establishing skills in the syllabus
- Embedding employability context through assessment design
- 42 key ideas on employability, employer engagement and enterprise

Contents

- 1 Editorial - Elaine Tilson
- 3 Employer engagement in the Earth and environmental sciences
- 11 HEA support for employer engagement (EE)
- 13 Talkin' 'bout my generation: a brief introduction to generational theory
- 16 A gap analysis of student employability profiles, employer engagement and work-placements
- 21 Employability of GEES graduates: the approach of the Environment Agency
- 25 Today's talent – tomorrow's energy: employing geography, earth and environmental scientists
- 29 Employer engagement - A practical perspective
- 33 The Chester Graduate/Undergraduate Employability Conference and Employability Strategy
- 37 Meteorology employers' requirements of graduates
- 39 Raising student awareness of enterprise skills: accredited and non-accredited routes
- 43 Enterprise and education in Geography: the case of the Plymouth Dragons
- 47 Embedding employability and employer engagement into postgraduate teaching: a case study from 'environmental management systems'
- 53 Knowledge transfer partnerships, environmental management systems and masters level teaching
- 56 Establishing a skills and employability audit and some devices for establishing skills in the syllabus
- 64 Embedding employability context through assessment design
- 68 42 key ideas on employability, employer engagement and enterprise

Planet

Planet is the biannual publication of the Higher Education Academy Subject Centre for Geography, Earth and Environmental Sciences.

Its aims are to:

- Identify and disseminate good practice in learning and teaching across the three disciplines of Geography, Earth and Environmental Sciences.
- Provide a forum for the discussion of ideas about learning and teaching in the three discipline communities.
- Provide information for readers on Subject Centre activities and on related resources, conferences and educational developments.

Planet welcomes contributions on topics related to learning and teaching in GEES subject areas.

Please see inside back cover for further information for contributors and advertisers.

All correspondence should be sent to:
The Editor, Planet, GEES Subject Centre,
University of Plymouth, Drake Circus,
Plymouth, Devon, PL4 8AA.

Tel +44 (0)1752 233 535
Email planet@gees.ac.uk

Planet 21 cover photos: credits and captions (clockwise from top left):

Lynne Sugden

Agricultural practice in the Midwestern USA, where crops are grown in strips following the natural contour of the land.

Andy Casely

The Aurora Borealis (Polar Aurora) viewed from Iceland is caused by the collision of charged particles from the sun's solar wind with atoms in the earth's upper atmosphere.

Lynne Sugden

The Purbeck Beds of the Jurassic Coast, Dorset.

Stewart Jamieson

Cross polarised close-up view of Gigjökull regelation ice crystals which are formed by pressure melting and refreezing of basal glacier ice.

Mike Sanders

New Red Sandstone flash flood deposits at Teignmouth, Devon.

Fraser Sugden

A bamboo bridge crosses a river in the Nepali plains and is an example of low-technology infrastructural improvements.

Notes for Contributors

Planet aims to be of use to practitioners in the GEES disciplines. It has a relatively short submission-to-publication processing time, is free and is disseminated to all GEES departments in the UK, and some overseas. Planet is also freely available to download from the GEES Subject Centre website. Hard copy circulation of Planet is typically between 2000 and 2500 copies per edition.

The editorial board of Planet welcomes material of interest to academics and support staff in the fields of teaching, learning and assessment across the three disciplines of Geography, Earth and Environmental Sciences (GEES). Generic submissions from cognate disciplines are also invited. Planet also welcomes learning and teaching 'work in progress'. Contributions can include case studies of learning and teaching practice, annotated web-links, software and book reviews, forum commentary, and letters to the editor. Main papers should be in the order of 1000–2000 words, although longer articles may be considered.

Planet is quality assured through in-house editing by members of the editorial board; papers are not generally externally refereed. Please note that all articles may be subject to minor in-house revisions, without the permission of the author(s).

Authors are requested to:

- make explicit why the work is relevant and important
- provide an abstract of no more than 150 words;
- have clear headings and signposts
- draw out learning points for other practitioners in a way that is likely to be useful
- provide a context for the work (e.g. module names, number of students, year of study, assessment criteria)
- provide evidence of something working, or not (e.g. student evaluative statements, not just anecdote)
- draw upon other pedagogic literature in GEES (e.g. previous editions of Planet, the Journal of Geography in HE and the Journal of Geoscience Education) - what other studies have been done
- supplement text with visuals where possible, e.g. tables, maps, figures, photographs and screen grabs
- reference the paper in accordance with the Harvard referencing system
- provide contact details, including department(s), institution(s), and email address(es).

All articles with any accompanying figures, tables, diagrams and photographs, should be submitted in electronic format to: planet@gees.ac.uk
